2025

ABHIRAJ. G. N
Architectural 3d Visualizer

abhiraj696@gmail.com
+971 56 159 56 56

What I Can Do?

Exterior/ Interior 3D Visualisation
Walkthrough Animations
Virtual Reality/ Interactive Experience
Project Management
Site Execution

Softwares I Know

3dsmax | Corona | Vray
Lumion | D5 Render
Premier pro | Photoshop

2025

ABHI RAJ. G.N

3D Visualizer

About

I am a skilled Architectural 3D Visualizer with a passion for creating visually stunning and functional designs that bring architectural concepts to life.

With Expertise in 3D modelling,rendering, and visualization, I possess a strong understanding of architectural principles, spatial design, and technical detailing.

My work spans various aspects of architectural visualization, from conceptual modelling to detailed renderings for both interior and exterior. I excel in leveraging cutting-edge design software to communicate design intent clearly and effectively.

I am committed to delivering highquality, client-focused solutions that meet both aesthetic and functional requirements.

Educational Qualification

+2 in commerce (St jhons model HSS Nalanchira)

PROFESSIONAL QUALIFICATION

18 months Animation Course from Animaster, Trivandrum.

6 months Autocad 2D and 3D course from SAI CADS Chempazhanthy.(2018-2019)

Software Skills

3ds MAX

Corona Renderer

Vray

Lumion

D5 Render

Premiere pro

Photoshop

Work Experience

Almas Designs, SHARJAH
Architectural 3D Visualizer
23-10-2024 – Still Working

INFRA I NOVA - Architectural 3D Visualizer
03-12-2019 –30-09-2024

BLOC HOUS engineers pvt ltd - Architectural 3D Visualizer
01-06-2019–30-11-2019

E-vartha online - Video Editor cum graphics Artist
1-11-2016 – 31-05-2019

Sparkling Infotech and Designs - 3D Graphic artist
17-03-2014 – 30-06-2015

Greenchild Image solutions pvt.ltd
3D Graphic artist
1-10-2009 to14-3-2014

Achievements

Developed detailed 3D models and high-quality visualizations for residential, commercial, and industrial projects, enhancing design presentations for clients and stakeholders.

Collaborated with architects and designers to translate 2D architectural plans into 3D models, ensuring accuracy in spatial layouts and design intent.

Created photorealistic renderings and walkthrough animations to support project proposals and marketing presentations,

Worked on both exterior and interior visualizations, includinglandscaping, urban planning, and interior layouts.

Utilized industry-standard software like 3ds Max, V-Ray, Lumion, and Photoshop to produce high-end renderings with precise lighting, textures, and materials.

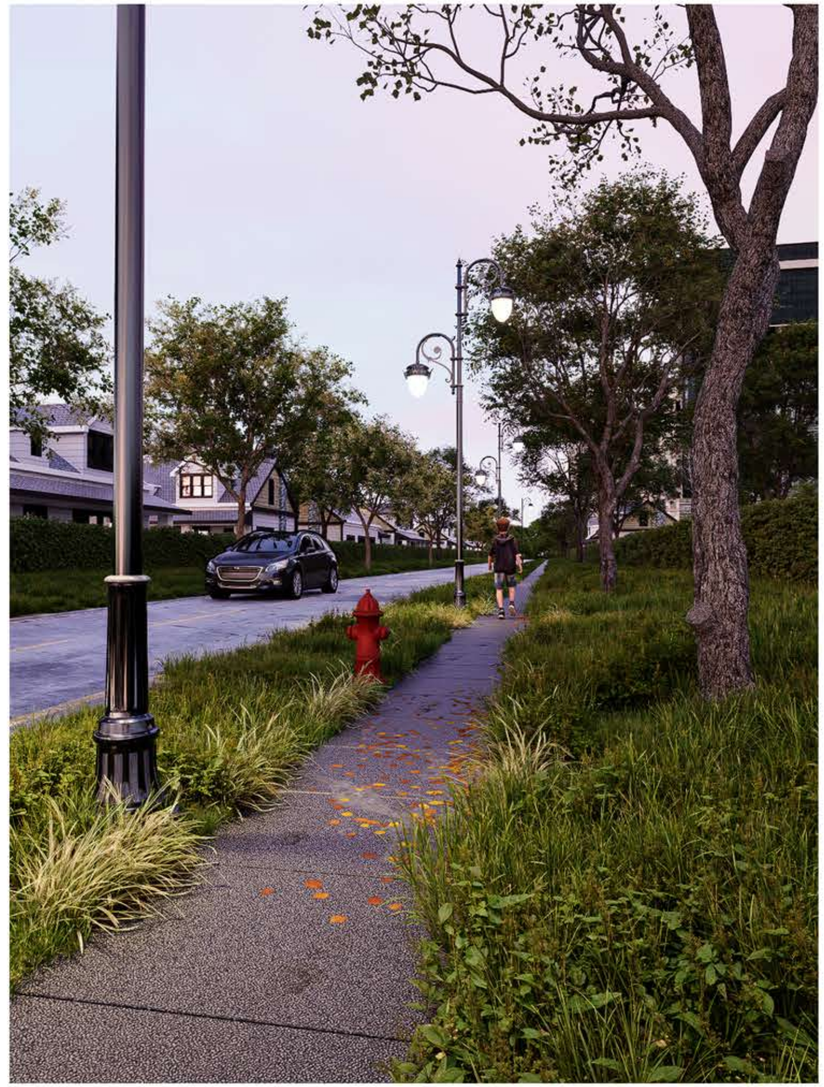

Produced 3D assets for virtual and augmented reality (VR/AR) projects, enhancing interactive user experiences in immersive environments.

2025

Downloaded 3ds Max Files and rendered using D5 Render and Lumion to achieve a warm, serene, and realistic atmosphere. Upscaled and Edited using Ai tools to create a cozy and functional space that reflects Style and more Reality

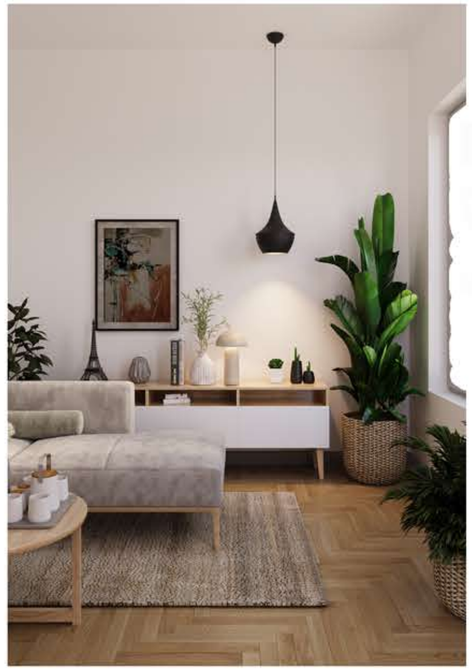

2025

This resort visualization showcases my ability to transform a downloaded 3D model into a realistic and engaging architectural scene. Using Lumion, I enhanced the environment with detailed materials, natural lighting, landscaping, and atmospheric effects to bring the resort to life. The focus was on creating a vibrant and inviting ambiance that highlights the architecture and surrounding context. While the base model was sourced from the internet, all rendering, scene composition, and artistic enhancements were completed by me, demonstrating my skills in architectural visualization, presentation, and creating visually compelling resort environments.

2025

These mood-focused 3D scenes were fully modeled and crafted by me to explore lighting, materials, and composition that evoke specific atmospheres and emotions. Using 3ds Max for modeling and Corona Renderer for high-quality visualization, I emphasized the interplay of light, shadow, and color to create immersive, visually compelling environments. Each scene highlights my ability to manipulate mood through textures, reflections, and spatial design, demonstrating both technical skill and artistic sensibility in 3D visualization. These projects showcase my proficiency in creating evocative, atmospheric renderings that communicate a feeling as much as a space.

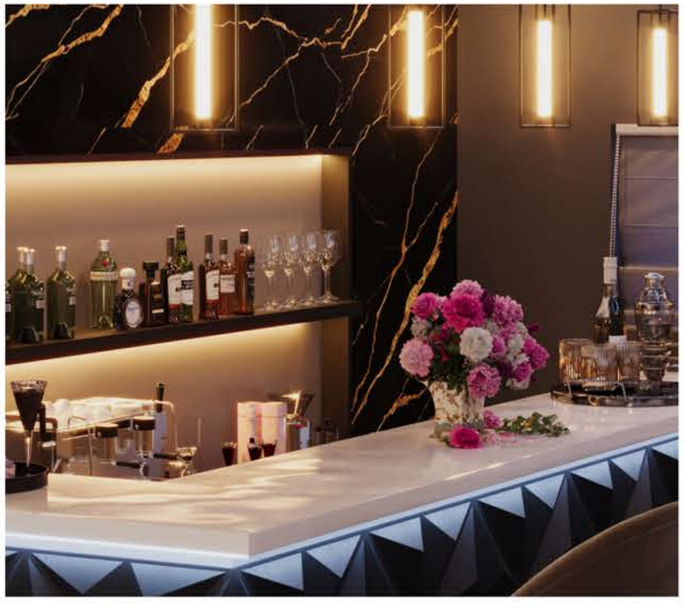

2025

This high-rise building render showcases my ability to transform a downloaded 3D model into a realistic and visually compelling architectural visualization. Using Lumion, I enhanced the scene with detailed lighting, material refinement, landscaping, and atmospheric effects to bring the structure to life. My focus was on creating a professional exterior perspective that highlights the design, environment, and overall mood of the project. Although the base model was sourced from the internet, all visualization, rendering settings, and artistic enhancements were done by me to demonstrate my skills in rendering, composition, and presentation.

2025

This café-cum-bar scene was entirely modeled by me in 3ds Max and rendered using Corona Renderer to create a warm, inviting, and atmospheric environment. I focused on crafting a balanced blend of casual café aesthetics and sophisticated bar elements through detailed furniture modeling, material selection, mood lighting, and spatial planning. The realistic lighting setup in Corona, combined with carefully chosen textures and décor, helped achieve an authentic ambiance that reflects both comfort and elegance. This project demonstrates my ability to design, model, and render commercial interior spaces with a strong emphasis on mood, detail, and visual storytelling.

Modelled in 3ds Max and rendered using Corona Renderer to achieve a warm, serene, and realistic atmosphere. I carefully designed the layout, furniture, materials, and lighting to create a cozy and functional space that reflects modern comfort and style.

2025

2025

These kitchen renders are meticulously modeled in 3ds Max and visualized using Corona Renderer, showcasing a perfect blend of functionality and modern design. Every element, from the refined cabinetry and countertops to the lighting and subtle decor, is crafted to reflect realism and elegance. Natural and artificial lighting techniques were used to enhance material textures and create a warm, inviting atmosphere. Post-production work further highlights depth, shadows, and detail, resulting in a high-quality visual ideal for professional presentation and portfolio display.

2025

This villa rendering project showcases my skills in transforming a downloaded 3D model into a realistic and visually engaging architectural scene. Using Lumion, I enhanced the villa with refined materials, natural lighting, landscaping, and atmospheric effects to bring the design to life. My focus was on creating a warm and inviting exterior presentation that reflects the elegance and functionality of modern villa architecture. While the base model was sourced from the internet, all visualization work, rendering settings, scene composition, and artistic enhancements were completed by me to demonstrate my expertise in rendering, detailing, and architectural presentation.

2025

This hotel interior inside a high-rise building was fully modeled by me in 3ds Max and rendered in Lumion to showcase a realistic and immersive design. I carefully developed the architectural elements, spatial layout, and furniture details to reflect a modern and luxurious hotel ambiance. In Lumion, I refined the scene with high-quality materials, natural and artificial lighting, atmospheric effects, and contextual elements to enhance the overall mood and realism. This project demonstrates my complete workflow—from concept and 3D modeling to visualization and final rendering—highlighting my skills in architectural modeling, interior design, and professional presentation.

2025

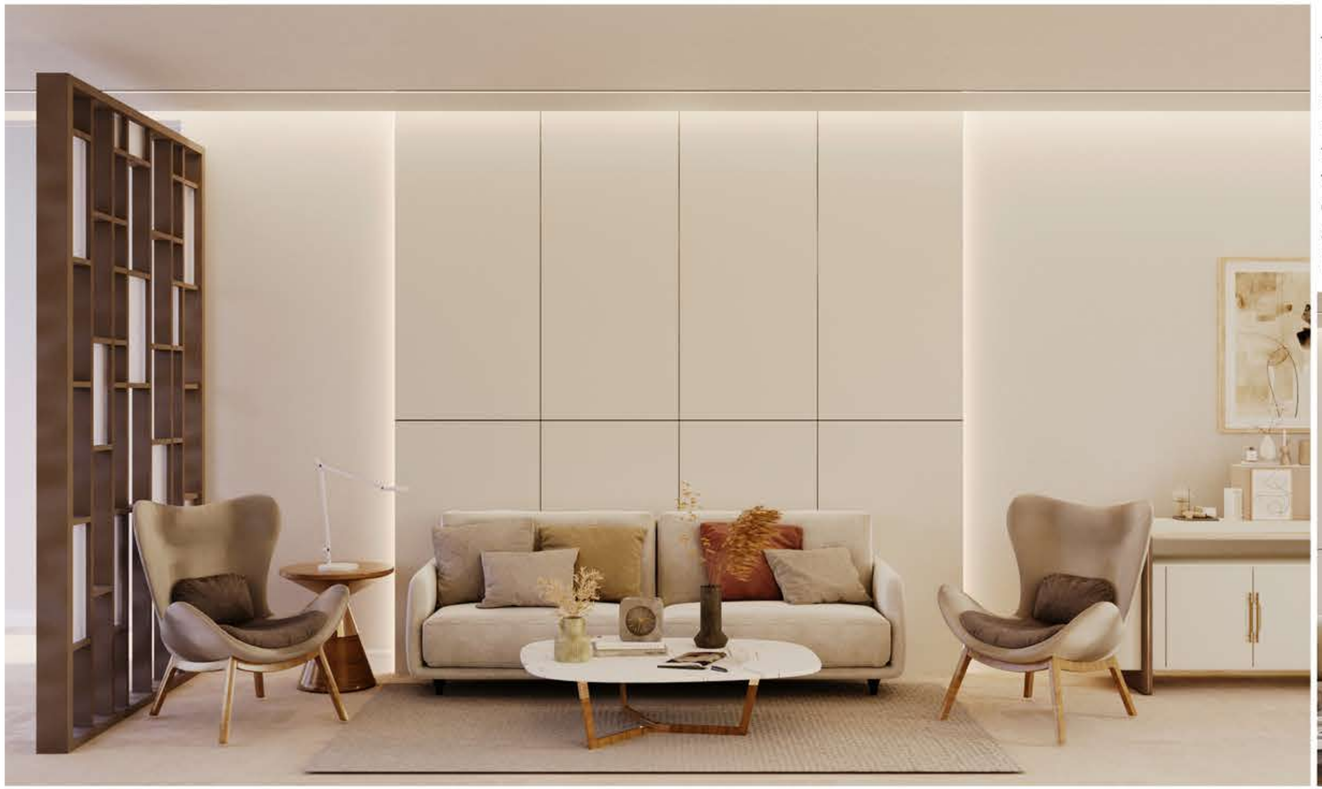

This living room interior project in Ajman was fully modeled by me in 3ds Max and rendered using Corona Renderer to create a modern, comfortable, and visually appealing space. I focused on designing a functional layout, detailed furniture, and realistic materials while carefully planning lighting to enhance the overall mood. Corona's rendering capabilities allowed me to accurately capture textures, shadows, and natural light, resulting in a warm and inviting atmosphere. This project demonstrates my expertise in interior modeling, lighting, and professional visualization, showcasing attention to detail and aesthetic refinement.

2025

This living room interior was fully modeled by me in 3ds Max and rendered using Corona Renderer to achieve a realistic and visually refined result. I focused on creating a balanced layout, detailed furniture modeling, realistic materials, and carefully planned lighting to enhance the ambiance of the space. The rendering process in Corona allowed me to capture natural light, depth, and textures accurately, bringing the design to life. This project highlights my skills in 3D modeling, lighting, and interior visualization, showcasing both creativity and technical precision.

2025

This interior living room project in Sharjah was fully modeled by me in 3ds Max and rendered using Corona Renderer to achieve high-quality realism. I carefully developed the layout, furniture, materials, and lighting to reflect a modern and elegant residential space tailored to the client's needs. After rendering, I enhanced the final visuals through post-production in Photoshop, refining light balance, colors, reflections, and overall mood to achieve a refined and realistic presentation. This project highlights my complete workflow—from 3D modeling and rendering to post-processing—showcasing my skills in interior design visualization and professional presentation.
